

UDSP Task List

Purpose

This document outlines tasks that need to be completed in order for UDSP to be implemented as a feature of LNet. This document shall also be used to track the tasks progress.

Overview

User Defined Selection Policy is an LNet feature described here (link). The feature has been signed off, so implementation is ready to commence. The implementation effort shall include work on modifications to the LNet code as well as introduction of new test scripts as part of LUTF framework (link) that is being developed in parallel.

Implementation Tasks

JIRA issue #	Status
 LU-9124 - Multi-Rail: User Defined Selection Policy RESOLVED UDSP introduction to LNet patch series	Code complete, Able to build, Under review
 LU-10973 - LNet Unit Test Framework (LUTF) Autotest Integration OPEN LUTF introduction	

Verification Tasks

JIRA issue #	Status
(N/A) Verification against feature requirement specification	In progress
(N/A) Add LUTF tests for UDSP feature	Did not start
(N/A) Regression test UDSP feature (not using LUTF)	Did not start
(N/A) Test UDSP feature using LUTF test suite	Did not start

Glossary

Term	Meaning
UDSP	User Defined Selection Policy
LUTF	LNet Unit Test Framework
