# Lustre Releases

## Lustre Community Releases

The latest Long Term Support (LTS) release is Lustre 2.15.4 - see Changelog for more details.

Download the latest LTS maintenance release here

The latest major release is Lustre 2.15.0 - see Changelog for more details.

Download the latest major release here

## Older Lustre Releases and Feature Roadmap

Download the latest 2.12 LTS maintenance release here

Download the final 2.10 LTS maintenance release here

The archive of older releases are also available here.

For the future plans please see the Lustre Roadmap.

For details of development in progress within the Lustre community see the Community Development wiki

## E2fsprogs Downloads

Users are encouraged to always run the latest version of e2fsprogs on their servers.

## Arm support

Linaro hosts builds for the latest Lustre and e2fsprogs.
